

ARMYSHOP

PATCHES

Sew your colours

The design and manufacture of uniform patches is strictly regulated by Army. For many years, we have been trusted to create woven and embroidered patches for official uniform wear. While the canvas may be small, you can think big when creating uniform patches. Mascots, mottos, crests and colours can be combined in striking ways to convey the distinctive identity of your unit.

Patch creation process

QUOTE: Your quote includes setup fees and unit price breakdowns.

ARTWORK: Once you have accepted the quote our experienced design team will work with you to create detailed colour artwork and a digital mock-up so you can see what your patch will look like.

PRODUCTION: Production and delivery time is about 4 weeks from receipt of your signed approval.

Manufacturing methods

Patches are available in two finishes – Embroidered or Woven and can be provided with hook-and-loop backing for attachment.

EMBROIDERED PATCHES: Embroidery provides a rich textured finish where the pattern is stitched over a sturdy backing material. Embroidery is a traditional patch manufacturing technique and can give the patch a 3D effect.

WOVEN PATCHES: In a woven patch the design is woven directly into the patch fabric, much the same as higher quality ties. This method produces a flat patch with extraordinary detail in the image and wording.

Navy uniform patches

The development and wearing of uniform patches within Army is strictly governed. Our team is highly experienced with the creation of policy-compliant uniform patches and can guide you along the process however you should ensure you have sought and obtained appropriate clearances for your design before proceeding to manufacture.

The standard uniform patches for Army are 75mm x 55mm. We can also make custom and event patches at any size.
